ABSTRACT

In this project report, I have presented an overview of Full stack web development. The whole report is divided into seven main chapters and a chapter dedicated to my project as mentioned in the Content section. Each chapter is further divided into several subtopics. There are four chapters in total stated as fundamentals of , comment variables and types in python, Indentation, Simple mathematical operations, conditionals and Project -The Turtle Crossing Capstone

Every subtopic contains a detailed explanation about the topic. My project is a turtle crossing game. It is developed using Python coding.

Keywords: **Python, project, Indentation.**
